

PBH Communication Bulletin FY 1112 NM 12

To: PBH Network Providers

From: Steve Tomlinson, Chief Operations Officer

Date: September 2, 2011

RE: PBH - Targeted Case Management

The Division of Medical Assistance has informed PBH that Medicaid will stop funding Targeted Case Management Services for LMEs operating under the 1915b/c Waiver effective September 30th, 2011. In preparation for that service to be eliminated, PBH will begin transitioning consumers from this service to alternative services. All consumers that currently receive Medicaid Funded Targeted Case Management have been identified. PBH will take the following steps to ensure a smooth transition.

Providers of Child Mental Health Residential Level 1-4 and In-State PRTE; Adult PSR; and Supervised Living and Adult Group Living High will be responsible for development of their consumer's Person Centered Plans (PCPs), unless the consumer is also receiving an enhanced service that includes case management functions (see below):

Enhanced services that already include case management functions:

IIHS (H2022)

MST (H2033)

Day Treatment (H2012 HA)

ACTT (H0040)

CST (H2015 HT)

SAIOP (H0015)

SACOT (H2035)

PBH will continue where applicable to pay providers of Child MH Residential Level 1-4 an enhanced specialized rate to facilitate the transition of consumers to a different level of care including locating providers/placements, assisting with needed applications, developing PCPs, etc.

PBH's Care Coordination Department will provide monitoring, PCP revision if indicated, and will assist with step down to lower level of care when applicable for children in out of state placements. Targeted

case managers currently supporting these consumers are encouraged to contact the PBH MH/SA Care Coordination Department at 704 721-2700.

B-3 Community Guide Services may be available to some consumers with intellectual and developmental disabilities who currently receive Targeted Case Management.

To make referrals for Community Guide or for additional questions related to service linkage, please don't hesitate to call our Call Center at 800 939-5911.
