Re: Interactive Educational Program

ADHD and substance abuse: Did you know?

- Researchers have found links between ADHD and the use of marijuana and other recreational drugs, particularly in people who also have other psychological disorders, such as obsessive-compulsive disorder.
- ADHD is 5 to 10 times more common among adult alcoholics than it is in people without the condition

Below is a free, interactive educational program for adults living with ADHD, or those caring for children with ADHD.
